Working Together to

Safeguard Children

The Department for Education has published an illustrated guide to **'Working Together to Safeguard Children (2023)'**. This resource aims to make crucial safeguarding messages more accessible to children, young people, families, and practitioners. It includes a variety of materials, such as an animated video and a practical toolkit, all designed for direct use with children and families. This will be a valuable asset for Early Years Practitioners, Apprentices, and families alike.
